

Job Vacancy

Electrical Hardware Engineer

WHO WE ARE

We are gapp.audio! A new startup in the live audio sector and we are building a game – changing mixing console.

WHAT WE NEED

We are looking for an Electrical Hardware Engineer (m/f) to join our team.

Required skills:

- Experience in electrical circuit design, analyzation, development
- Experience with microcontrollers (Raspberry Pi, Arduino)
- Willing to work in a promising startup and passion for audio applications

Preferred skills:

- Experience with audio AD/DA conversion
- Interface bus knowledge: I2S, I2C
- Basic knowledge of mixing consoles
- Responsible and team-oriented work attitude

Since we are an early stage startup, we cannot reward you financially but we offer you the chance to act out your creativity, to produce new ideas and last but not least we offer you the chance to be part of our kick-ass team. After finishing our prototype, we offer profit sharing and employment.

WANT TO JOIN?

Call us or write an email for more information.
