

Job Vacancy

FPGA Design Engineer

WHO WE ARE

We are gapp.audio! A new startup in the live audio sector and we are building a game – changing mixing console.

WHAT WE NEED

We are looking for a FPGA Design Engineer (m/f) to join our team.

Required skills:

- VHDL knowledge
- Digital Signal Processing knowledge
- Willing to work in a promising startup and passion for audio applications

Preferred skills:

- Experience with audio DSP on FPGAs
- Interface bus knowledge: I2S, DSD, I2C
- Experience with scaling FPGA applications
- Basic knowledge of mixing consoles
- Responsible and team-oriented work attitude

Since we are an early stage startup, we cannot reward you financially but we offer you the chance to act out your creativity, to produce new ideas and last but not least we offer you the chance to be part of our kick-ass team. After finishing our prototype, we offer profit sharing and employment.

WANT TO JOIN?

Call us or write an email for more information.
