

Job vacancy

Hardware Engineer

WHO WE ARE

We are gapp.audio, a new startup in the live audio sector, currently developing a game-changing mixing console. With a brand-new prototype ready to go, we are now looking for people to join our team and take it to the next level!

WHAT WE NEED

We have an open position for a Hardware Engineer (m/f/d) to join our team from 01.09.2020 for a full-time job (40h/week).

You need to meet the following mandatory requirements:

- At least a bachelor's degree
- Registered in Berlin.

You are passionate for music technology and have experience in at least two of the following areas and are willing to develop your skills in the other areas:

- PCB design and PCB assembly, ideally with SMD components
- Microcontroller based project that contained at least I2C or SPI
- DSP project with FIR or IIR filters
- Worked with ADCs and/or DACs

WHAT WE OFFER

We are currently applying for startup founder grants from the German government. Your salary depends on the programme we get accepted into but is approximately 2000€.

WANT TO JOIN?

Contact me and let us talk about your past projects, your interests, and your visions.

Join us in an early stage and contribute your ideas to the project!
